A Gps User Manual : Working with Garmin Receivers by Dale ...

Assisted GPS or Augmented GPS (abbreviated generally as A-GPS and less commonly as aGPS) is a system that often significantly improves the startup performance—i.e., time-to-first-fix (TTFF)—of a GPS satellite-based positioning system. A-GPS is extensively used with GPS-capable cellular phones, as its development was accelerated by the U.S. FCC's 911 requirement to make cell phone location ...

Assisted GPS - Wikipedia

GPS is used for navigation in planes, ships, cars, and trucks also. The system gives critical abilities to military and civilian users around the globe. GPS provides continuous real-time, 3-dimensional positioning,

navigation and timing worldwide. How does GPS System Work? The GPS consists of three segments:

You'll get a more realistic figure by looking in the specification section of your GPS receiver's user-manual. Typically, with a handheld GPS, 95% of horizontal GPS positions will be within 10 metres of their true location. The error in altitude will probably be at least twice the horizontal error.
