Examples of Semantic Web Applications Other lessons address what the Semantic Web is, what are key characteristics of a Semantic Web application, and where its strengths lie compared to most traditional technologies (coming soon!). This lesson presents several specific, successful examples of Semantic Web applications in order to bring these lofty ideas down to reality.

Examples of Semantic Web Applications

Abstract: Novel nonvolatile universal memory technology is essential for providing required storage for nanocomputing. As a potential contender for the next-generation memory, the recently found "the missing fourth circuit element," memristor, has drawn a great deal of research interests.

Dynamical Properties and Design Analysis for Nonvolatile ...

The Semantic Web is an extension of the World Wide Web through standards set by the World Wide Web Consortium (W3C). The goal of the Semantic Web is to make Internet data machine-readable.. To enable the encoding of semantics with the data, technologies such as Resource Description Framework (RDF) and Web Ontology Language (OWL) are used. These
